

Environment, Health and Security Policy (EHS)

Serravalle Copper Tubes S.r.l.

Serravalle Scrivia Plant

Our company, **Serravalle Copper Tubes S.r.l.**, with the Serravalle Scrivia plant, is committed to pursuing objectives of EHS excellence and leadership, by implementing several Actions for the Environmental Sustainability and Health and Safety at Work in the organization and management of its production and commercial processes, in a perspective of continuous improvement:

Our commitments

Our commitments, in line with the Group's Sustainability strategy, focused on four main themes (raw materials, resources, emissions into the atmosphere and social impact), are:

- Developing preventive strategies to avoid environmental pollution and accidents;
- Achieving the "Zero accidents" goal, by providing a safe and healthy working environment for employees, collaborators and visitors;
- Preventing occupational diseases and improving the employees' health;
- Using efficiently both materials and energy in the production and supply of products and services;
- Manufacturing products that meet safety, energy efficiency and recyclability requirements;
- Promoting a culture in which all employees share these commitments.

Our support for the UN Sustainable Development Goals (SDGs)

Our sustainability commitments have the ambition to contribute to the following SDGs:

Our actions for the Environment

- Continuous and progressive reduction of **CO2 emissions** (both direct and derived from energy consumption);
- Maintenance of **recovered water** levels of use for production purposes higher than 90%;
- Increasing the use of **recycled and recovered metals**;
- Reducing the production of **packaging wastes**;
- Reducing **energy consumption** through the adoption of advanced management practices and the progressive installation of more efficient systems.

Our actions for Health and Safety at Work

- Increasing the number of hours of **non-compulsory** safety and risk **training**;
- Maintaining an effective system for reporting the management and resolution of **Near Miss, Unsafe Act** and **Unsafe Condition**;
- Reducing the number of **accidents** and the resulting frequency index;
- Improving all the time **internal health and safety communication**.

Every employee of the Plant, from managers to supervisors and workers, must become aware of their role and responsibilities in the implementation of the actions provided for by the company policy
